Safe Drinking Water

A field guide for households and villages.

Chapter 2. Boiling

To make water safe, bring water to a rolling boil for one minute.
At altitudes above 2000 metres, boil water for three minutes.
Let the boiled water cool in a clean, covered container.

Chapter 3. Water purification with chlorine

Purification by chlorination: add two drops of bleach per litre.

Solar disinfection (SODIS) uses clear bottles left in the sun for six hours.
